

DECHEMA Annual Meeting

The PFI Biotechnology and Microbiology Department presented conference papers at this year's ProcessNet Annual Meeting, held together with 32nd DECHEMA Annual Meeting of Biotechnologists from 12 to 15 September 2016 at Aachen.

Dr. Patrick Ballmann presented the latest results from the [FNR On-Site-Enzymes Research Project \(FKZ 22027312\)](#) to an interested specialist audience and answered numerous questions in the subsequent discussion.

A PFI poster presentation reported highly promising findings from the [CORNET SaliChem Project \(136 E\)](#). Here too there were many interested inquiries.

On balance PFI was very pleased with the event. The Institute was able to present two successful projects to a wide audience of experts at one of the most important German meetings for biotechnology and also able to make promising new contacts.
